b. Handling the Revitalization of Idle Public Facilities

- (1) In September of 2005, the PCC formed a task force for the revitalization of idle public facilities at the direction of the Executive Yuan. By the end of December 2008, the task force had handled 153 cases, as shown in table 5.
- (2) All agencies in charge are asked to become actively involved in understanding and assisting with the 51 cases still in progress.
- (3) The PCC has called on all agencies, in the process of handling public works projects, to first study the project necessity and feasibility, and then consider the priority when formulating budgets. This will help the agencies to avoid committing inappropriate investments and wasting the national resources.

c. Engineering Technique Appraisal Work

(1) Mechanism

The PCC continued to accept requests from judicial, inspection and investigative agencies for assessment cases concerning construction management, examination and acceptance, and maintenance that arise during the various stages of the life-cycle of public works projects, including the planning, design, and construction phases. Taking the role of a neutral, actively administering government agency, the Commission provided engineering appraisal and expert opinions to assist judicial investigative agencies as they handled public works projects cases.

2. 51件持續列管中，請各目的事業主管機關積極涉入瞭解協助。
3. 今後興辦公共設施，工程會業已要求各機關在編列預算前，應先進行必要性及可行性評估，確定有必要性及可行性，再依優先次序，據以編列預算興辦，以防範不當之投資，浪費國家資源。

(三) 工程技術鑑定業務

1. 機制

接受司法、檢查、調查機關囑託之涵蓋規劃、設計、施工期間工程管理、驗收接管及使用維護等公共工程生命週期的各個階段所產生待鑑定之案件。以政府督導機關中立之角色提供工程技術鑑定及專業諮詢意見，協助司法檢調機關處理公共工程案件。
